

OpenELIS Monthly Sub Committee Call

May 14, 2014

Participants:

Gary Jones

Mark Manell – ITSD MO

Greg – South Carolina

Travis - Iowa

Paul S – Univ of Washington

Huy – Vietnam

Shondra - Missouri

1. Roll call

2. Update on OpenELIS website – Shondra, Reshma, Gary
Survey Results, Design Progress

Reshma provided update on survey results – there were 17 total

Part of redesign is look and navigation. Comments hinge around content on website.

Will focus on that. Hope to have website done in early June

3. OpenELIS Governance Process – Reshma, Dari, Gary
Governance Draft Document

Implementers - Certification Process

Gary sent out early draft last month

Got some feedback on this draft.

Reviewing and making changes. Asked community to provide feedback

Have developed certification process for implementers to identify partners that can work with individual labs. Goal with OpenELIS2 is to keep a common code base so don't have unique implementations as we go forward. Have standardized set up, messaging etc. If not common code base, upgrades are very challenging.

Reshma gave update on certification process

Annual fee for certification. Way for foundation to provide service to implementers and to states.

Focused on U.S. partners for now. May consider global subsequently

4. OpenELIS Updates for U.S. and Global – All

Travis - UC Davis has their version up and running with Oracle database

Dari made presentation to Iowa Dept of Public Health for enhancing Newborn screening

Shondra – on Monday meeting with ITSD to talk about the process - either RFP or sole source to get OE going

Greg – Putting together data and criteria so they can put an RFI out. Will have to go through the procurement process here regardless. Talking about how to send it to make sure they have legal technicalities taken care of

Global

Paul – Final testing for release to LNSP in Haiti. Also expanding to regional lab in CI. Major push has been getting away from ad hoc responses for QA issues and moving towards canned issues. Try to develop a list that can be selected from

Huy – update on data exchange between OE and hospital information systems in VN

Reshma – Update on OEDG and planning for workshops

5. Other Discussion or questions
